

Philip MacLellan 木曜 4 時限 対面授業 開講言語 (English)

I. 研究分野

行動経済学、実験的研究方法、教育心理学、社会文化的発達理論、質的研究、事例研究

II. 研究分野 (英語表記)

Behavioral Economics, Experimental Research Methods, Educational Psychology, Sociocultural Theories of Learning and Development, Qualitative and Case Study Research

III. 修士課程学生の履修要件

The language of this seminar is English. Graduate students who are capable of reading English research papers independently and discussing actively are welcome to join.

IV. 選考期間および方法

In the first year of your program, contact me by email in April before the end of the registration period.

V. 指導方針

This seminar begins in the 1st year of the graduate program. The aim of first year is to establish a research theme and learn how to research that topic using a qualitative or mixed methods methodology. In Spring term of second year, students will fine-tune their research question based on their reading and discussion of the empirical literature and how their project relates to it and fills an identified gap. In Summer term, students develop a data collection strategy/instrument and prepare to collect data. Autumn and Winter terms are devoted to data analysis and thesis write-up.

In this seminar, students can expect to report their progress weekly. Students would also benefit from taking my graduate level Research Writing skills courses and attending a workshop in the appropriate field of inquiry.

VI. 博士後期課程学生の履修要件

Students who will be completing a quantitative research project should have a basic knowledge of statistics and the use of statistical software.
