The Review is published by the Japanese Economic Association and is open to all researchers in the field of economics. Non-members as well as members of the Association are welcome to submit unpublished research articles for editorial consideration. The Review will be published four times a year in March, June, September and December. Prospective contributors may find the submission procedure on the inside back cover of each issue of the Review. The Review is sent to all members of the Japanese Economic Association four times a year. Membership fees for the Association are ¥10,000 a year. A single copy of the Review may be obtained for ¥1,400.

The Abe Fellowship Program 368
The Social Science Research Council (SSRC), the American Council of Learned Societies (ACLS), and the Japan Foundation Center for Global Partnership (CGP) are accepting requests for applications for the 1999–2000 Abe Fellowship Competition.

The Abe Fellowship is designed to encourage international multidisciplinary research on topics of pressing global concern in order to foster the development of a new generation of researchers interested in long-range policy-relevant topics.

- Applications are welcome from scholars and non-academic research professionals who propose research projects in the social sciences or the humanities relevant to any one or combination of the following three themes: global issues, problems common to advanced industrial societies, and issues that relate to improving US-Japan relations. Priority is placed on projects which are contemporary, policy-relevant and comparative in nature.
- Abe Fellows are eligible for up to 12 months of full-time support for research and fieldwork. Terms of the Fellowship are flexible; however, it is expected that at least one-third or more of Fellowship tenure will be spent in residence abroad in Japan or the United States. Fellowships are for projects by individual researchers only.
- Abe Fellowships are open to American and Japanese citizens, as well as other nationals who can demonstrate strong and serious long-term affiliations in the research communities of the US or Japan. Applicants must hold the Ph.D. or the terminal degree in their field, or have attained an equivalent level of professional experience. Applications from researchers in professions other than academia are welcome. Previous language experience is not a prerequisite for this Fellowship.

Application forms may be obtained from the Social Science Research Council. The deadline for submission of applications is September 1 annually. For further information or to request an application please contact:

Abe Fellowship Program  
Social Science Research Council  
810 Seventh Avenue  
New York, NY 10019, USA  
Phone: (212) 377-2700  
Fax: (212) 377-2727

Fellowships are subject to available funding. Women and members of minority groups are particularly encouraged to apply.

For more details on the Abe Fellowship Program, or for information on other Fellowships in and about Japan, please consult SSRC’s website at: http://www.ssrc.org
Symposium on Intertemporal Equilibrium Theory and Nonlinear Dynamics

Introduction .......................... Kazuo Nishimura and Harutaka Takahashi

Equilibrium, Trade, and Capital Accumulation .................. Lionel McKenzie

Stability and Turnpike Theorems in Dynamic Competitive Equilibrium

Makoto Yano

On the Welfare Significance of National Product for Economic Growth and Sustainable Development ................ Swapan Dasgupta and Tapan Mitra

Transboundary Pollution in a Dynamic Game Model .................. Engelbert J. Dockner and Kazuo Nishimura

Comparing Open-loop with Markov Equilibria in a Class of Differential Games ........ Ngo Van Long, Koji Shimomura and Harutaka Takahashi

On the Existence of Chaotic Policy Functions in Dynamic Optimization

Tapan Mitra and Gerhard Sorger

Indeterminacy Arising in Multi-sector Economies .................. Jess Benhabib and Kazuo Nishimura

Instructions to Contributors

1. Manuscripts and editorial communications should be sent in quadruplicate to The Editors, The Japanese Economic Review, The Institute of Statistical Research, 1-18-16 Shimbashi, Minato-ku, Tokyo, Japan 105-0004.

Manuscripts should be written in English, and should be accompanied by a letter of submission stating that they are original unpublished work, not submitted for consideration elsewhere. Authors should supply an English abstract not exceeding 100 words and the JEL classification number(s).

Upon acceptance of an article, author(s) will be asked to transfer copyright of the article to the Japanese Economic Association.

2. Manuscripts should be typed on one side of the paper only, using double spacing throughout and leaving adequate margins on all sides. All pages should be numbered consecutively, and references, tables and legends for figures should be prepared on separate pages.

3. The first page of manuscripts should contain the following information:
   (a) title;
   (b) name(s) and affiliation(s) of the author(s); and
   (c) the address for editorial correspondence, along with phone and fax numbers and an e-mail address.

4. Footnotes should be kept to a minimum and be numbered consecutively. Acknowledgements may be given before the list of references.

5. Where mathematical derivations are abbreviated in articles, full derivations that explain each step of the argument should accompany the manuscript in order to assist referees. These derivations will not be published.

6. In choosing mathematical notation, the following rules should be observed in order to avoid unnecessary delays and reduce printing expenses.
   (1) Avoid unusual symbols when common usage will do without ambiguity, e.g., use $a^*$ instead of $a$;
   (2) Avoid notation that requires setting in small fonts, e.g., use $x_i(t)$ instead of $x_i^t$;
   (3) Avoid fractions in the $\frac{a}{b}$ form when $a/b$ form will do;
   (4) Avoid expressions in the $e^{(x)}$ form when $f(x)$ is complex, e.g., use $\exp\{-c_1^2 + c_2^2\}$ instead of $e^{(c_1^2 + c_2^2)}$;
   (5) Avoid $\frac{df}{dx}$ or $\frac{\partial^2 f}{\partial x_1 \partial x_2}$ notation where $f'$ or $f_{12}$ will serve without any ambiguity;
   (6) Reduce the heights of expressions such as $\int$, $\sum$ and $\prod$ by using, e.g., $\sum_{i=0}^{\infty}$ instead of $\sum_{i=0}^{\infty}$;
   (7) Use abbreviations for complex expressions which appear frequently.

7. Statistical tables and diagrams should be neatly prepared with clear explanations, so that the reader can understand their meaning without hunting in the text for an explanation.

8. Bibliographical references should be accurate, and should follow the style and punctuation in the following example:

References

Citation of references in the text should be by author(s) followed by parenthesized Arabic numerals denoting the year of publication; for example, Aitchison and Brown (1957), Arrow (1951, Theorem 1), Panzer and Willig (1977b, p. 488), etc.

9. Manuscripts that do not conform to these requirements may cause unnecessary delay in processing and may be returned to the authors.
