The Japanese Economic Review

The Journal of the Japanese Economic Association

Vol. 55 No. 1 March 2004

Presidential Address:
A Theory of Commodity Tax Reform under Revenue Constraint ........................................... Tatsuo Hatta

2003 JEA-Nakahara Prize:
Announcement ........................................................................................................... Tatsuo Hatta
Moral Hazard and Other-Regarding Preferences .............................................. Hideshi Itoh

Articles:
Commodity Taxation and Economic Growth ................................................................. Koichi Futagami and Junko Doi
The Role of Expectation in Job Search and the Firm Size Effect on Wages ......................... Takako Fujiwara-Greve and Henrich R. Greve
Optimal Taxation of Elderly Care Services ................................................................. Masatoshi Yoshida and Koichi Yuki
The Multi-Sector Business Cycle Model and Aggregate Shocks: An Empirical Analysis ........................................................................................................ Naohito Abe
The Japanese Economic Review

Volume 55  Number 1  March 2004

The Journal of the Japanese Economic Association

Editor
Akira Okada
Hitotsubashi University

Co-Editors
Shinichi Fukuda (The University of Tokyo); Masanori Hashimoto (Ohio State University);
Kazuo Mino (Osaka University); Taku Yamamoto (Hitotsubashi University)

Honorary Board
Michio Hatanaka  Takashi Negishi  Miyohei Shinohara  Hirofumi Uzawa

Associate Editors
Kaushik Basu (Cornell University); Jess Benhabib (New York University); Eric Bond (The Pennsylvania State
University); Kwan Choi (Iowa State University); James Friedman (University of North Carolina); Masahisa
Fujita (Kyoto University); Tatsuo Hatta (The University of Tokyo); Charles Horioka (Osaka University);
Toshihiro Ihori (The University of Tokyo); Atsushi Kajii (Kyoto University); Kazuya Kamiya (The University
of Tokyo); Yoshitsugu Kanemoto (The University of Tokyo); Kunio Kawamata (Keio University); Ali Khan
(Johns Hopkins University); Nobuhiro Kiyotaki (London School of Economics); Masahito Kobayashi
(Yokohama National University); Laurence Kotlikoff (Boston University); Naoto Kunitomo (The University
of Tokyo); Lung Fei Lee (Hong Kong University of Science and Technology); Michihiro Ohiyama (Keio University);
Colin McKenzie (Osaka University); Tapan Mitra (Cornell University); Prasanta Pattanaik (The University
of California, Riverside); Debraj Ray (Boston University); Gary Saxonhouse (The University of Michigan); Alan
Stockman (The University of Rochester); John Sutton (London School of Economics); Hiroshi Teruyama
(Kyoto University); Jacques Thisse (CORE. Université Catholique de Louvain)

Production Editor
Rosie Scott (email: rosie.scott@blackwellpublishingasia.com)

This journal is also published online at www.blackwell-synergy.com

The Review is published by the Japanese Economic Association and is open to all researchers in the field of
economics. Non-members as well as members of the Association are welcome to submit unpublished research
articles for editorial consideration. The Review will be published four times a year in March, June, September
and December.

Membership fees for the Association are ¥12,000 a year.

Abstracting and Indexing: This Journal is abstracted/indexed in the Social Sciences Citations Index®, ISI Alerting
Services®, Social SciSearch®, Current Contents®/Social and Behavioral Science, EconLit, e-Jel, Cambridge
Scientific Abstracts and JEL on CD.

Editorial correspondence should be sent to the Editors, The Japanese Economic Review, Japanese Economic
jea@isr.or.jp.

Disclaimer: The Publisher, Association and Editors cannot be held responsible for errors or any consequences
arising from the use of information contained in this journal; the views and opinions expressed do not neces-
sarily reflect those of the Publisher, Association and Editors. neither does the publication of advertisements
constitute any endorsement by the Publisher, Association and Editors of the products advertised.

This journal is printed on acid-free paper.

The publication of The Review is financially supported in part by the Grant-in-Aid for Publication of
Scientific Research Result from the Japan Society for the Promotion of Science.

Instructions to Contributors

Manuscripts should be written in English, and should be accompanied by a letter of submission stating that they are original unpublished work, not submitted for consideration elsewhere. Authors should supply an English abstract not exceeding 100 words and the JEL classification number(s).

Upon acceptance of an article, author(s) will be asked to transfer copyright of the article to the Japanese Economic Association. This transfer will ensure the widest possible dissemination of information.

2. Manuscripts should be typed on one side of the paper only, using double spacing throughout and leaving adequate margins on all sides. All pages should be numbered consecutively, and references, tables and legends for figures should be prepared on separate pages.

3. The first page of manuscripts should contain the following information:
   (a) the title;
   (b) the name(s) and affiliation(s) of the author(s); and
   (c) the address for editorial correspondence, including phone and fax numbers and an e-mail address.

4. Footnotes should be kept to a minimum and be numbered consecutively. Acknowledgements can be given before the list of references.

5. Where mathematical derivations are abbreviated, the full workings necessary for justifying each step of the argument should accompany all manuscripts of a mathematical nature in order to assist referees. These workings will not be published.

6. In choosing mathematical notation, the following rules should be observed in order to avoid unnecessary delays and reduce printing expenses.
   (1) Avoid unusual symbols when common usage will do without ambiguity, e.g., use \( a^* \) instead of \( \tilde{a} \);
   (2) Avoid notation which requires setting in small fonts, e.g., use \( x(t) \) instead of \( x \);
   (3) Avoid fractions in the \( \frac{a}{b} \) form when \( (a/b) \) form will do;
   (4) Avoid expressions in the \( e^{ax} \) form when \( f(x) \) is complex, e.g., use \( \exp\{(x^2 + y^2)/a^2\} \) instead of \( e^{-\frac{x^2+y^2}{a^2}} \);
   (5) Avoid \( \frac{df(x)}{dx} \) or \( \frac{\partial^2 f(x)}{\partial x_1 \partial x_2} \) notation when \( f' \) or \( f'' \) will serve without any ambiguity.
   (6) Reduce the heights of expressions such as \( \int \), \( \sum \) and \( \Pi \) by using, e.g., \( \sum_{i=0}^n \) instead of \( \sum_{i=0}^n \);
   (7) Use abbreviations for complex expressions which appear frequently.

7. Statistical tables and diagrams should be neatly prepared with clear explanations, so that the reader can understand their meaning without hunting in the text for explanations.

8. Bibliographical references should be accurate, and follow the style and punctuation in the following examples:

References

Citation of references in the text should be by author(s) followed by parenthesized Arabic numerals denoting the year of publication, as Aitchison and Brown (1957), Arrow (1951, Theorem 1), Panzer and Willig (1977b, p. 488), etc.

9. Manuscripts that do not conform to these requirements may cause unnecessary delay in processing and may have to be returned to the authors.
