The Japanese Economic Review

The Journal of the Japanese Economic Association

Vol. 56  No. 1  March 2005

Presidential Address:
The Exchange Rate in the Japanese Economy: The Past, Puzzles, and Prospects ......................................................... Takatoshi Ito

2004 JEA–Nakahara Prize:
Announcement ................................................................. Makoto Yano
On Detail-Free Mechanism Design and Rationality .... Hitoshi Matsushima

Articles:
The Existence of Equilibrium in a Differentiated Duopoly with Network Externalities ......................... Luca Lambertini and Raimondello Orsini
Fiscal Policy in an Endogenous Growth Model with Public Capital and Pollution ............................................................... Alfred Greiner
Social Security and the Intragenerational Redistribution of Lifetime Income in Japan .......................................................... Takashi Oshio
Testing the One-Way Effect in the Presence of Trend Breaks ......................... Yuzo Hosoya, Feng Yao and Taro Takimoto
The Japanese Economic Review

Volume 56 Number 1 March 2005

Presidential Address:
*The Exchange Rate in the Japanese Economy: The Past, Puzzles, and Prospects*
Takatoshi Ito

2004 JEA–Nakahara Prize:
*Announcement*
Makoto Yano

*On Detail-Free Mechanism Design and Rationality*
Hitoshi Matsushima

Articles:
*The Existence of Equilibrium in a Differentiated Duopoly with Network Externalities*
Luca Lambertini and Raimondello Orsini

*Fiscal Policy in an Endogenous Growth Model with Public Capital and Pollution*
Alfred Greiner

*Social Security and the Intrigenerational Redistribution of Lifetime Income in Japan*
Takashi Oshio

*Testing the One-Way Effect in the Presence of Trend Breaks*
Yuzo Hosoya, Feng Yao and Taro Takimoto
Articles:

Sharecropping, Land Exploitation and Land-Improving Investments .................................................. Tridip Ray

Free Trade Networks with Transfers .... Taiji Furusawa and Hideo Konishi

Use of the Money Supply in the Conduct of Japan’s Monetary Policy: Re-Examining the Time-Series Evidence .................................................. Ryuzo Miyao

Wages, Hours of Work and Job Satisfaction of Retirement-Age Workers ............................................... Isao Ohashi

Domestic Competition Policy and Tariff Policy Compared ................................................................. Rika Takahashi

An Optimal Scheme for Injecting Public Funds under the Moral Hazard Incentive for Banks ...................... Hiroshi Osano
The Japanese Economic Review
(Formerly The Economic Studies Quarterly)
The Journal of the Japanese Economic Association

Editor
Akira Okada
Hitotsubashi University

Co-Editors
Shinichi Fukuda (The University of Tokyo); Masanori Hashimoto (Ohio State University); Kazuo Mino (Osaka University); Taku Yamamoto (Hitotsubashi University)

Honorary Board
Michio Hatanaka  Takashi Negishi  Miyohei Shinozaka  Hirofumi Uzawa

Associate Editors
Kaushik Basu (Cornell University); Jess Benhabib (New York University); Eric Bond (The Pennsylvania State University); Kwan Choi (Iowa State University); Dipankar Dasgupta (Indian Statistical Institute); James Friedman (University of North Carolina); Masahisa Fujita (Kyoto University); Tatsuo Hatta (The University of Tokyo); Charles Horioka (Osaka University); Toshihiro Iihori (The University of Tokyo); Atsushi Kajii (Kyoto University); Kazuya Kamiya (The University of Tokyo); Yoshitsugu Kanemoto (The University of Tokyo); Kunio Kawamata (Keio University); Ali Khan (Johns Hopkins University); Nobuhiro Kiyotaki (London School of Economics); Masahito Kobayashi (Yokohama National University); Laurence Kotlikoff (Boston University); Naoto Kunitomo (The University of Tokyo); Lung Fei Lee (Hong Kong University of Science and Technology); Michihiro Ohkama (Keio University); Tapan Mitra (Cornell University); Prasanta Pattanaik (The University of California, Riverside); Debraj Ray (Boston University); Gary Saxonhouse (The University of Michigan); Alan Stockman (The University of Rochester); John Sutton (London School of Economics); Hiroshi Teruyama (Kyoto University); Jacques Thisse (CORE, Université Catholique de Louvain)

The Review is published by the Japanese Economic Association and is open to all researchers in the field of economics. Non-members as well as members of the Association are welcome to submit unpublished research articles for editorial consideration.

Membership fees for the Association are ¥12,000 a year.

Abstracting and Indexing: This Journal is abstracted/indexed in the Social Sciences Citations Index®, ISI Alerting Services®, Social SciSearch®, Current Contents®/Social and Behavioral Science. EconLit, e-Jel. Cambridge Scientific Abstracts and JEL on CD.

Editorial correspondence should be sent to the Editors, The Japanese Economic Review, Japanese Economic Association, The Institute of Statistical Research, 1-18-16 Shimbashi. Minato-ku, Tokyo, Japan 105-0004 jera@ist.or.jp.

Instructions to Contributors

Manuscripts should be written in English, and should be accompanied by a letter of submission stating that they are original unpublished work, not submitted for consideration elsewhere. Authors should supply an English abstract not exceeding 100 words and the JEL classification number(s).

Upon acceptance of an article, author(s) will be asked to transfer copyright of the article to the Japanese Economic Association. This transfer will ensure the widest possible dissemination of information.

2. Manuscripts should be typed on one side of the paper only, using double spacing throughout and leaving adequate margins on all sides. All pages should be numbered consecutively, and references, tables and legends for figures should be prepared on separate pages.

3. The first page of manuscripts should contain the following information:
   (a) the title;
   (b) the name(s) and affiliation(s) of the author(s); and
   (c) the address for editorial correspondence, including phone and fax numbers and an e-mail address.

4. Footnotes should be kept to a minimum and be numbered consecutively. Acknowledgements can be given before the list of references.

5. Where mathematical derivations are abbreviated, the full workings necessary for justifying each step of the argument should accompany all manuscripts of a mathematical nature in order to assist referees. These workings will not be published.

6. In choosing mathematical notation, the following rules should be observed in order to avoid unnecessary delays and reduce printing expenses.
   (1) Avoid unusual symbols when common usage will do without ambiguity, e.g., use $a^*$ instead of $a$;
   (2) Avoid notation which requires setting in small fonts, e.g., use $x_i(t)$ instead of $x_i$;
   (3) Avoid fractions in the $\frac{a}{b}$ form when $(a/b)$ form will do;
   (4) Avoid expressions in the $e^{ax}$ form when $f(x)$ is complex, e.g., use $\exp(-(x^2 + y^2)/a^2)$ instead of $e^{-x^2/a^2}$;
   (5) Avoid $\frac{df(x)}{dx}$ or $\frac{2f(x)}{dx}$ notation where $f'$ or $f''$ will serve without any ambiguity;
   (6) Reduce the heights of expressions such as $\int$, $\sum$ and $\Pi$ by using, e.g., $\sum_{i=0}^n$ instead of $\sum_{i=0}^n$;
   (7) Use abbreviations for complex expressions which appear frequently.

7. Statistical tables and diagrams should be neatly prepared with clear explanations, so that the reader can understand their meaning without hunting in the text for explanations.

8. Bibliographical references should be accurate, and follow the style and punctuation in the following examples:

References

Citation of references in the text should be by author(s) followed by parenthesized Arabic numerals denoting the year of publication, as Aitchison and Brown (1957), Arrow (1951, Theorem 1), Panzer and Willig (1977b, p. 488), etc.

9. Manuscripts that do not conform to these requirements may cause unnecessary delay in processing and may have to be returned to the authors.
