INTERNATIONAL ECONOMIC ASSOCIATION

IEA 15th World Congress, Istanbul, Turkey, Guillermo Calvo, President, 2005 - 2008

The next Congress of the International Economic Association will be held in Istanbul on June 25-29, 2008, thanks to the efforts of the Turkish Economic Association and its President, Ercan Uygur. The central topic will be The Challenge of Globalization. Below are a few examples of topics that would fit in that category. The list is just illustrative and does not preclude other topics that directly or indirectly help to cast light on the challenges faced by globalized economies. In particular, we welcome submissions dealing with innovative microeconomic methods which help to understand and address some of these challenges, like, for instance, randomized experiments to evaluate the impact of social policies.

International Finance
Macroeconomic Policy
Commodity Stabilisation Funds
Trade and Growth
Migration Issues
Political Economy Considerations
The Role of the State and Institution in a Globalised Environment
Global Imbalances
Globalisation in Historical Perspective

♦ The Programme Committee
The scientific preparation of the Congress is placed under the responsibility of the IEA President.
Professor Guillermo Calvo, who is assisted by an international Programme Committee composed of:

Daron Acemoglu, Turkey, (MIT)
Yilmaz Akyuz, Turkey, (UNCTAD)
Sumru Altug, Turkey, (Koc University. Istanbul)
Masahiko Aoki, Japan, (Stanford University)
Kaushik Basu, India, (Cornell University)
Oya Celasun, Turkey, (IMF)
Fabrizio Coricelli, Italy, (EBRD)
Eduardo Engel, Chile, (Yale University)
Joan Esteban, Spain, (Instituto de Analisis Economico, Barcelona)
Ronald Findlay, USA, (Columbia University)
Jean-Paul Fitoussi, France, (OFCE & Sciences-Po Paris)
Heba Handoussa, Egypt, (ERF, Cairo)
Michael Hoel, Norway, (Oslo University)
Alejandro Izquierdo, Argentina, (IADB)
Semiñ Koray, Turkey, (Bilkent University, Ankara)
Janos Kornai, Hungary, (Collegium Budapest)
Alan Krueger, USA, (Princeton University)
Enrique Mendoza, Mexico, (University of Maryland)
Pablo Andres Neumeyer, Argentina, (Di Tella University, Buenos Aires)
Luigi Paganetto, Italy, (University of Rome Tor Vergata)
Arvind Panagariya, India, (Columbia University)
Lucas Papademos, Greece, (European Central Bank)
Victor Polterovich, Russia, (CEMI. Moscow)
Dani Rodrik, Turkey & USA, (Harvard University)
Eytan Sheshinski, Israel, (University of Jerusalem & Princeton University)
Horst Siebert, Germany, (Kiel University)
Robert Solow, USA, (MIT)
Ercan Uygur, Turkey, (Ankara University)
Alessandro Vercelli, Italy, (Università di Siena)
Jinglian Wu, China, (Development Research Center, Beijing)

♦ Format
The Congress days will be devoted to invited lectures on the main themes and to parallel sessions of contributed papers. Papers are suitable in any subject area of economics. Topics of broad interest to countries throughout the region are welcome.

♦ Paper submission guidelines
Papers and abstract (written in English) should be sent only electronically to the following address: http://www.iadb.org/res/iea.cfm by February 1, 2008. Notification of acceptance will be sent by March 15, 2008.

IEA Secretariat : 23 rue Campagne Première 75014 Paris, France - Tel : 33 1 43 27 91 44 - Email:  iea@iea-world.org
Instructions to Contributors

1. Manuscripts and editorial communications should either be emailed in PDF format to submission.jer@isr.or.jp or addressed in quadruplicate to The Editors, The Japanese Economic Review, The Institute of Statistical Research, 1-18-16 Shimbashi, Minato-ku, Tokyo, Japan 105-0004.

Manuscripts should be written in English, and should be accompanied by a letter of submission stating that they are original unpublished work, not submitted for consideration elsewhere. Authors should supply an English abstract not exceeding 100 words and the JEL classification number(s).

Authors publishing in the journal will be asked to sign an Exclusive License Form. In signing the form it is assumed that authors have obtained permission to reproduce any copyrighted or previously published material. All authors must read and agree to the conditions outlined in the form, and must sign the form or agree that the corresponding author can sign on their behalf. Articles cannot be published until a signed form has been received.

2. Manuscripts should be typed on one side of the paper only, using double spacing throughout and leaving adequate margins on all sides. All pages should be numbered consecutively, and references, tables and legends for figures should be prepared on separate pages.

3. The first page of manuscripts should contain the following information:
(a) the title;
(b) the name(s) and affiliation(s) of the author(s); and
(c) the address for editorial correspondence, including phone and fax numbers and an e-mail address.

4. Footnotes should be kept to a minimum and be numbered consecutively. Acknowledgements can be given before the list of references.

5. Where mathematical derivations are abbreviated, the full workings necessary for justifying each step of the argument should accompany all manuscripts of a mathematical nature in order to assist referees. These workings will not be published.

6. In choosing mathematical notation, the following rules should be observed in order to avoid unnecessary delays and reduce printing expenses.
(1) Avoid unusual symbols when common usage will do without ambiguity, e.g., use $a^*$ instead of $a$;
(2) Avoid notation which requires setting in small fonts, e.g., use $x_i(t)$ instead of $x'_i$;
(3) Avoid fractions in the $\frac{a}{b}$ form when $(alb)$ form will do;
(4) Avoid expressions in the $e^{ax}$ form when $f(x)$ is complex, e.g., use $\exp[-(x^2 + y^2)/a^2]$ instead of $e^{-x^2}$;
(5) Avoid $\frac{d}{dx} f(x)$ or $\frac{\partial^2 f(x)}{\partial x \partial x}$ notation where $f'$ or $f''$ will serve without any ambiguity;
(6) Reduce the heights of expressions such as $\int$, $\sum$ and $\Pi$ by using, e.g., $\sum_{i=0}^n$ instead of $\sum_{i=0}^n$;
(7) Use abbreviations for complex expressions which appear frequently.

7. Statistical tables and diagrams should be neatly prepared with clear explanations, so that the reader can understand their meaning without hunting in the text for explanations.

8. Bibliographical references should be accurate, and follow the style and punctuation in the following examples:

References

Citation of references in the text should be by author(s) followed by parenthesized Arabic numerals denoting the year of publication, as Aitchison and Brown (1957), Arrow (1951, Theorem 1), Panzer and Willig (1977b, p. 488), etc.

9. Manuscripts that do not conform to these requirements may cause unnecessary delay in processing and may have to be returned to the authors.

Author Services enables authors to track their article, once it has been accepted, through the production process to publication online and in print. Authors can check the status of their articles online and choose to receive automated emails at key stages of production so they do not need to contact the production editor to check on progress. Visit www.blackwellpublishing.com/bauthor for more details on online production tracking and for a wealth of resources, including FAQs and tips on article preparation, submission and more.
